

The American Association of State Highway and Transportation Officials is an organization that sets standards for highway design and construction. Most AASHTO standards are direct equivalents to existing ASTM standards.

The AASHTO M292 specification covers the chemical and mechanical requirements for carbon, alloy and stainless steel nuts intended for use in high-pressure and/or high-temperature service from  $\frac{1}{4}$ " through 4" . This standard is identical to ASTM A194.
